

every CHOICE SUPPORT MATERIALS

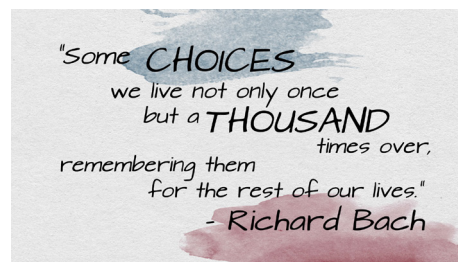

For any of the activities provided in the toolkits, you can also use the bulletin board and posters included in this materials to support those activities. The Bulletin board materials are provided as individual pieces you can print off on a desktop color printer in various sizes. Cut the individual elements into interesting shapes before putting on the board. The background of the board can be any color of paper you have access to. If possible, use three colors and just tear them at an angle and tack to the board one over the other as indicated in the mock-up below. This will achieve the rough edge look intended. A file called "Bulletin Board.pdf" is provided as reference to show how the board could be arranged.

Also included is a series of 11 x 17 posters which highlight the 3 D's (direct, distract, delegate) which can be posted as a reminder of those options. In addition, there are a variety of small posters (8.5 x 11) that you can post around your hall or meeting rooms that contain statistics related to each of the topics covered in the 4-week series. Post the appropriate ones based on the topic you are covering.
